

## Metal Dripper + Pitcher + Bottle Set

### a. No Papers Required

Brew delicious, clear pour over without the mess of filter papers, with the Hario Metal Dripper + Decanter. Sitting over a high-quality borosilicate glass decanter, the stainless steel dripper consists of two finely-etched mesh filters which overlap to give you a clear, sediment-free brew.

### b. Pitcher Perfect

For use with both hot and cold brewing, the Hario Filter-in-Pitcher features a stainless steel mesh filter that has been set into the pouring spout to allow for a steady constant pour with ease.

### c. Filter While You Pour

The Filter-in-Bottle allows you to create all sorts of cold-brewed sensations. Simply add cold water to your favourite tea leaves, herbs, or fruit, replace the spout/filter, and refrigerate for 3-6 hours.

This Filter in Bottle & Cup set comes with one Filter in Bottle (Black) and two borosilicate glass cups (130ml).
